Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Drew Hissong on 5/10/05.

The application has been amended as follows:

In the **Specification**:

On Page 1, in the "CROSS-REFERENCE TO RELATED APPLICATIONS" section, after "09/453,313," insert "--now US Patent 6,703,233,--".

In the **Claims**:

Cancel Claim 185.

In Claims 186 and 187, after "method of claim", delete "185" and substitute "--156--".

In Claims 186 and 187, after "wherein the", delete the phrase "prokaryotic cell" and substitute "--bacterial strain--".

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest the claimed method of making a live attenuated bacterial vector vaccine. Applicants have developed an improved plasmid maintenance system for stabilization of low copy plasmids in bacterial vaccine strains. The incorporation of a post-segregational killing system and plasmid partition functions in the low copy number expression plasmids represents a non-obvious improvement over traditional balanced-lethal maintenance systems for stabilization of multicopy plasmids in attenuated bacterial vaccine strains. The prior art using traditional balanced-lethal systems is represented by Schodel et al. (Infect. Immun., 1994, Vol. 62, No. 5, pp. 1669-1676).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

It is noted that non-initialed changes to the specification (Brief Description of the Drawings section) filed 1/5/04 were present on page 15. As these changes were not initialed by applicant, they are not considered part of the specification. However, the portions of the specification containing the non-initialed changes were subsequently properly amended in a preliminary amendment filed concurrently with the application papers.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Guzo, Ph.D., whose telephone number is (571) 272-0767. The examiner can normally be reached on Monday-Thursday from 8:00 AM to 5:30 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Irem Yucel, Ph.D., can be reached on (571) 272-0781. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
